PROFESSIONAL SUMMARY

Technical professional with strong expertise in **Data Science, Machine Learning, and Software Development** (Python, SQL, Tableau). I combine a **primary focus on technical execution** with the ability to manage stakeholder requirements and project documentation. Seeking a hands-on technical role (e.g., Data Analyst, Solution Engineer) in an international environment.

- **Languages:** English (C1/C2 - Fluent), Mandarin (C2 - Fluent), German (A2 - Basic), Malay: Native language
- **Status:** Eligible for Red-White-Red Card (Highly Qualified Worker).

SKILLS

- **Technical Skills & Programming:** Object-oriented programming (Python, Java fundamentals), AI & Machine Learning (TensorFlow, PyTorch, Keras, scikit-learn, OpenCV), Data Science & Analytics (NumPy, SciPy, pandas, Matplotlib, Tableau), HTML, Javascript
- **Project Management:** Project lifecycle management, problem solving, stakeholder engagement and management, meeting facilitation and documentation, scrum methodologies, agile methodologies, kanban (Trello), Ms Project, R&D, requirement gathering
- **International Collaboration:** Cross-disciplinary communication, international mobility program knowledge, collaboration in interdisciplinary teams, cross-cultural communication
- **Development Tools:** Git, Visual Studio Code, LaTeX, Anaconda, Microsoft Office (including advanced Excel with VBA automation), IBM InfoSphere DataStage, IBM InfoSphere Data Replication, Tableau
- **Administrative & Organization:** Research ethics and compliance knowledge, Sustainability Framework Understanding

EXPERIENCE

Technical Project Coordinator | Montanuniversität Leoben, Austria

Nov 2023 – Mar 2025

- Demonstrated ability to bridge technical and domain expertise by coordinating the development of an ML classification system that required translating complex AI concepts between geological specialists and technology teams
- Researched AI classification challenges for geological materials, identifying key differences in multi-context classification requirements compared to single-purpose systems, informing better stakeholder requirement gathering
- Served as primary technical point of contact and quickly acquired knowledge about waste management challenges to implement an AI solution addressing 59% of Austria's total waste volume, while developing visual explanations and non-technical summaries that successfully brought together 3 research units and industrial partners who lacked shared technical vocabulary and provided technical support to interdisciplinary teams
- Identified communication barriers between technical specialists and proactively created knowledge exchange frameworks, demonstrating ability to analyze stakeholder needs and adapt information delivery for diverse audiences
- Enhanced project visibility by learning how to translate complex research findings into compelling narratives for publication, adapting quickly to the requirements of scientific communication for different stakeholder groups

Research Intern | Montanuniversität Leoben, Austria

Feb 2023 – Sept 2023

- Successfully developed and implemented a deep learning-based sign language recognition system achieving 87% accuracy rate, culminating in a master's thesis that received distinction and established a foundation for future assistive technology research
- Developed technical documentation skills by creating comprehensive reports and user manuals, adapting writing style to suit different audience needs from technical specialists to end users

Research Intern | University of Granada, Spain

Jun 2022 – Sept 2022

- Conducted 3-month design sprint for accessibility technology: user research → color recoloration algorithm implementation → cross-platform prototyping → user testing
- Developed cross-platform mobile application using React Native, Flask, JavaScript for iOS/Android, implementing color recoloration algorithms for accessibility
- Delivered working color vision assistance Proof of Concept application using iterative development methodology

Business Intelligence Consultant | SturnGroup, Malaysia

Feb 2020 – Aug 2021

- Managed the end-to-end implementation of a Change Data Capture system, using MS Project to track progress and creating Gantt charts to ensure on-time delivery to stakeholders
- Applied project tracking methodologies to coordinate comprehensive business intelligence report development
- Establish test metrics and performance benchmarks that reduced projected disaster recovery time from 8 hours to 30 minutes, documenting all validation procedures for stakeholder review
- Developed VBA automation tools to streamline data processing workflows

Software Developer | Merimen Online, Malaysia

Dec 2018 – Jan 2020

- Resolved software bugs in SE Asian motor insurance processing system, reducing claim handling errors and improving overall application stability
- Developed web-based solutions using JavaScript, jQuery, HTML, CSS, and ColdFusion for insurance claim processing
- Consistently completed 95% of assigned sprint tickets within deadline using ticket tracking system

EDUCATIONS & COURSES

2025	Certified in AI Ethics (Focus: Risk mitigation, EU compliance, and bias reduction in commercial applications).
2024	Nordic Probabilistic AI School, hosted by Pioneer Center of AI at University of Copenhagen.
2023	ASAI National Summer School in Artificial Intelligence, hosted by the Center for Artificial Intelligence and Machine Learning (CAIML) at TU Wien.
2021-2023	Erasmus Mundus Joint Master (EMJM) Photonics for Security Reliability Sustainability and Safety > University Jean Monnet, France. Master of Science Diploma in Optics, Image, Vision, Multimedia. > University of Eastern Finland, Finland. Master Of Science in Photonics > University of Paris-Est Créteil, France. Master of Science Diploma Optics, Image, Vision, Multimedia with the specialization "Biometrics and Intelligent Vision".
2020	365 Data Science's course on PowerBI, Tableau, SQL + Tableau; Google Cloud's course about Google Cloud Platform technologies, Big Data and Machine learning. Link to badges .
2014-2018	Bachelor's Degree in Computer Science. Universiti Malaysia Sabah, Malaysia

AWARDS & HONOURS

- Scholarship recipient in the AI Ethics Certificate Program (Turing College & DIVERSIFAIR project)
- Scholarship recipient in the Master's program 'Photonics for Security, Reliability, Safety' (PSRS Consortium)
- Microsoft Azure Most Potential Project Award – InvestHack 2020 - Organized by Bursa Malaysia

VOLUNTEER EXPERIENCE

UMS Bon Odori Festival 2016 - Led organization of annual Bon Odori Festival, coordinating with Japan Embassy in Kota Kinabalu, local Japanese schools, and volunteer teams to strengthen Malaysia-Japan cultural relations

Volunteer of Trash Hero Borneo - Participated in weekly beach clean-up initiatives to combat marine pollution and promote environmental awareness
